MIL-SAMIT Part 1 – .30 cal 7.62 NATO M80

25 shots in an 8 inch circle.

Sample Size - 16 x 16 x 1.83 inches

Deansteel has manufactured ballistic doors and frames for over 10 years, but due to increasing security threats around the world we've expanded our research and development of new ballistic products over the past two years. We now offer a full line of custom engineered bullet resistant doors, frames, and windows to suit many applications.

All of our BR products have been tested by Southwest Research Institute to the full threat spectrum mitigated by Underwriters Laboratories Standards for Bullet Resisting Equipment (UL-752), NIJ Standard 0108.01-Ballistic Resistant Protective Materials, and ASTM F1233 - Ballistic Criteria.

Ballistic Resistance

- Military Small Arms Multiple Impact Threat
- Underwriters Laboratories – 752 Ballistic Standards Levels 1–8
- National Institute of Justice – 0108.01
- American Society for Testing and Materials – F1233

Test Certification

Complete test reports certifying full compliance with the agency requirements listed above are available. Tests for our door and frame assemblies were conducted by an independent testing laboratory.

Fire Protection

Underwriters Laboratories - 10B & 10C Positive Pressure Fire Tests of Door and Frame assemblies capable of a 20 minute through a 3 hour rating. Door sizes range from 4'0 x 8'0 on a single swing and 8'0 x 8'0 on a pair of doors.

Frame Profile & Door Design

Door designs are available in Flush, Vision, and Narrow light configurations. Frame profiles can be custom engineered to suit your architectural needs including specialty items such as pass thrus & windows.

Ballistic Resistant Wood Doors
